*** SPECIAL NOTICE ***

Dear Property Owner:

This is to notify you that the WPCA of Norwalk will be rehabilitating the sanitary sewer mains in your neighborhood using a method called CIPP (Cured-in-Place Pipe) lining. This will provide a new, jointless sewer pipe that minimizes root and water infiltration problems, improves conveyance, and provides for a more structurally sound pipe without the need for excavation. To perform this work, there will be a temporary disruption of sewer service to your residence or business for a period of approximately 8 hours.

During this period your property's sewer service connection will be completely sealed at the mainline in the street. Please limit the use of water going down your drains to an absolute minimum, and do not use washing machines or dishwashers. If you must shower; leave the water in the tub until your service has been restored. Any sump pumps illegally connected to the sewer system must be disconnected and/or discharged elsewhere; to avoid possible damage to our liner, or backups in your basement. Failure to follow these instructions may cause your discharge to backup into your property.

The "INSITUFORM" lining is scheduled for one day during the week of _____ on residential streets, the set-up of equipment may cause some adjustments in parking and neighborhood driving patterns; however, every effort will be made to make this inconvenience as slight as possible.

During certain phases of the operation, you may detect an odor. Odors are most likely to occur in houses or buildings with dry or non-existent traps. In most cases, pouring several gallons of water down your sinks, showers, toilets, etc. and opening your windows can minimize any odors.

Please be advised that there is a possibility that some water could come up from your toilets during the installation. Please keep lids closed and covered with a towel as well as some towels around the base of the toilets as a precaution.

You will be notified with another notice called CAUTION NOTICE like this one the day before the actual installation in your neighborhood.

If you have any questions or concerns regarding this project, please contact one of the following.

Construction Manager:	Ken Shurak – 207-841-4881	Insituform
Onsite Superintendent:	Lesly Simon – 774-261-2279	Insituform
Project Manager:	Nate Holmes - 207-841-0906	Insituform
Project Engineer:	Dylan Dorris -209-304-0717	Brown and Caldwell

Thank you for your cooperation.
